# North Shore 650 CR

## STATEMENT OF QUALITY, DESIGN & PERFORMANCE

Developed through North Shore's strong commercial building background, the 650 CR Cabin Runabout's structural integrity can perform in any sea conditions, at speeds of 50 knots, with a total maximum weight of 1700 kilograms. North Shore challenges any Boat Manufacturer that can equal or better this Statement.

# 650 CR

## Cabin Runabout

### REPUTATION

North Shore Boats has been manufacturing quality fibreglass boats in Perth, Western Australia, since 1957. In the early years, the company earned an enviable reputation for building Surveyed Commercial Boats. Later, it expanded its operations and built recreational fibreglass boats of up to 15 metres.

In the mid '90s, North Shore Boats was steered in a new direction by a talented commercial boat builder. He used North Shore's good reputation, plus extensive market research to focus on what today's boat owners' want tomorrow.

North Shore's research has developed a new spirited performer called the 650 CR Cabin Runabout. The design and construction of the 650 CR has raised the bar in offshore performance and safety.

That bar has been backed by North Shore's Statement of Quality, Design and Performance.

### CONSTRUCTION

Tremendous pressure is placed on the underside of all boat hulls so North Shore has built the hull with cutting edge construction on the 650 CR to take the punishment, even in heavy sea conditions.

Each 650 CR hull starts with a lay up of two sheets of tri-axial and double-bias glass matting, plus an outer

skin Gelcoat called Maxguard ISO-NPG, considered the best Gelcoat in the industry.

The end manufacturing process of the 650 CR hull is an 18mm thick keel, 14mm thick chines, 9mm thick hull and side panels and 7mm thick upper deck sections. This is why North Shore can back its Statement of Quality, Design & Performance to ensure that the 650 CR gives exceptional offshore performance and safety.

Many boats in any type of sea conditions tend to vibrate severely, which is generally caused by a thinner hull structure. The 650 CR performs with minimum flex and vibration in any sea conditions, due to applying a commercial standard hull thickness coupled with a one-piece hull and deck. This process ensures you enjoy your offshore cruising with maximum comfort and driveability to the max.

In addition, North Shore applies a 20mm high-density foam moulded to the floor to keep the weight down but maintain the hull's structural integrity throughout.

### STABILITY

The 650 CR has a finely tuned and balanced configuration of length x beam x weight x hull design.

It is a truly stable craft with solid construction based on a built to commercial survey philosophy. North Shore customers who are experienced fisherman say the 650 CR is surprisingly stable when two to three keen fishermen are working their rods on one side of the boat. When it comes to being sea sick, less rock in a boat is a good boat for fishing.

Size is everything, and the 650 CR offers a deceptively spacious cabin and cockpit, plus substantial room for three fishermen working on one side of the boat, or up to four divers with gear, or a family of six enjoying a day of cruising, skiing or just soaking up the sun and enjoying the boating lifestyle.

### SAFETY

The height of the internal gunwales is 910mm. This means the hip-bone of a 1.8m tall person would be level with the top edge of the gunwale. Kids under 10 years have a greater level of protection from falling overboard with their chest to shoulders leaning against the top edge of the gunwale. This safety aspect is a big plus for families.

For added safety, the fishing part of the boat (the sides) have toe support channels along the edges of cockpit

### OPTIONAL EQUIPMENT

- Hydraulic Steering System (recommended)
- Electric Toilet with Cover & Cushion
- Two Tone Colour Hull
- Dual Swim Boards
- Integral Swim Board Ladder
- Fold Down/Removable Rear Lounge
- Removable Transom Door with Ice Box
- Electric Anchor Box
- Full Lock up Cabin Doors
- Electric Pressure Deck Wash
- Transom Shower with 60L Bladder Tank

### SPECIFICATIONS

- Construction - Fibreglass
- Length Overall - 6.5 metres
- Hull Length - 6.0 metres
- Beam - 2.5 metres
- Overall Height (Incl Trailer) - 2.4 metres
- Inside Gunwale Height - 910 mm
- Outside Gunwale Height - 1020 mm
- Hull Weight - 1100 kgs
- Fuel Tank Capacity - 208 litres
- Outboard transom height - 635mm (25")
- Max Horsepower - 200 hp (upgrade to 250hp - ABYC Standards)

### KEY STANDARD FEATURES

- 200L Under Floor Storage/Kill Tank
- Moulded Live Bait Tank in Transom
- Fully Moulded Side Pockets
- Curved Glass Windscreen & Hatch
- Fully Upholstered Cabin
- Deluxe Back to Back Seat Boxes
- Deluxe Driver/Passenger Bucket Seats
- Rear Helm Seat Cushions
- Navigation Lights
- Aft Bait Cutting Board
- Steering System not Supplied

floor, with a non-skid surface strip. This is invaluable when you are reeling the big one in and landing it, without losing your footing in choppy conditions.

### LAYOUT

Standard seating is for four people with an optional removable transom lounge to seat extra people. A full sized lined cabin with extra long sleeping bunks can accommodate 2 x 1.9m tall adults for overnight stays. There is abundant storage from stem to stern with full length moulded shelves in the cabin, compartments under the sleeping bunks, moulded side pockets in the cockpit, transom lockers with sealed doors and the inside of the box pedestals on the captain and passenger chairs.

Under the cockpit floor there is a generous 208 litre fuel tank and a 200 litre fully insulated kill tank fitted with drainage bungs. Fishing or picnicking is a breeze with the standard dual-purpose live bait tank/ice chest moulded in the transom with an access door that doubles as a bait cutting board. Optional is a removable icebox that also works as a transom access door. It can be removed from the boat and used as a portable esky, when you have anchored at your favourite bay or hideaway.

### WARRANTY

North Shore Boats provides a seven-year structural hull warranty on all its models, that's how confident the company is about its manufacturing processes. North Shore gives you complete peace of mind in your investment.
